DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Einhorn et al in view of Harris. Einhorn et al teach a temperature sensor (20) within a tracheotomy tube. The temperature sensor (20) is coupled to an alarm system (18). An audio visual alarm (44) is sounded due to dislodging or cessation of breathing patterns. See col. 3, ll. 34-43. While disclosing an alarm system that is triggered when predetermined criteria is met (no change in air temperature over a preset time interval), Einhorn et al do not specifically recite setting a predetermined temperature. However, Harris discloses a tracheotomy tube with a temperature sensor (thermistor). See col. 3, ll. 3-9. When air movement stops, the temperature changes such that a critical threshold (predetermined temperature) is reached and an alarm sounds. The advantage is to provide a warning before breathing or movement of the patient has ceased altogether. See col. 2, ll. 51-61. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the alarm system of Einhorn et al with the predetermined temperature setting of Harris to provide a warning before breathing or movement of the patient has ceased altogether.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. McCrosky whose telephone number is 703-305-1331. The examiner can normally be reached on Mon-Fri 8:30-5:00.
